If you're having problems getting the Black ops 2 app to work on your computer or want to learn why there's a file called "SteamAppId.txt" in the steam folder, then this is the article for you! First of all, make sure you've installed and run an antivirus and malware program. The next step is to try and get the app working by completely uninstalling your copy of Black ops 2 from Steam. If none of these remedies work, try adding this file: "appid. txt" to your steam.appcache file...make sure you backup this file before you do anything! If all of those steps still haven't worked, then there's a good chance the problem is with your info or account on Steam!
